Work History

Lockheed Martin IS&GS

October 2006 to Present

STRATCOM - Offutt AFB, NE

Lead Nuclear Planning and Execution System (NPES) Systems Administrator

- Manage and perform initial setup, configuration and testing of new operating systems, application software, and hardware platforms operating in the NPES software development, test, and production environments.
- Lead in the design, test, and implementation of new hardware and software for the NAOC and ABNCP aircraft.
- Oversee security configuration and documentation of Microsoft Windows and Oracle Solaris operating systems to meet STRATCOM and DISA security requirements.
- Administer 20+ Oracle Solaris servers running SPARC and X86 versions of Oracle Solaris.
- Administer 10+ Windows servers running Microsoft Windows 2003.
- Maintain hard drive and tape backup for the NPES test and development environment.

Computer Sciences Corporation (CSC)

October 2004 to October 2006

STRATCOM - Offutt AFB, NE

ITCC UNIX Systems Administrator

- Perform Sun Microsystems workstation and server installations for Unclassified, Secret, and Top Secret networks.
- Responsible for all Sun Solaris user accounts for the Top Secret network.
- Troubleshooting Sun Hardware and Sun Solaris operating systems.
- Involved in Sun StorEdge 9980 configuration, maintenance, and troubleshooting on 4 StorEdge 9980 systems in the Secret and Top Secret networks.
- Configuration, maintenance, and troubleshooting on 3 StorageTek tape library systems in the Unclassified, Secret, and Top Secret networks.
- Responsible for Tivoli Framework, User Administration, Enterprise Console, Distributed Monitoring, and Storage Manager, this includes 8 Tivoli servers on Unclassified, Secret, and Top Secret networks.
- Maintain all security documentation and configuration for the Tivoli Management Environment on Unclassified, Secret, and Top Secret networks.

TEK Systems

October 2003 to March 2004

Northrop Grumman

March 2004 to October 2004

STRATCOM - Offutt AFB, NE

NPES Systems Engineer

- Responsible for 5 Servers and 50 clients running Windows 2000 on Secret and Top Secret networks.
- Administer 20 Sun Solaris servers on Secret and Top Secret networks.

- Maintain all networking equipment for Secret and Top Secret networks hubs, Cisco switches, and cabling.
- Responsible for administration and configuration of Terminal Services, IIS, DNS, DHCP, and Active Directory on Windows servers.
- Implementation of all Windows application and server software security patches as well as Norton Antivirus Server virus scans and updates.
- Provide over-the-phone hardware and software troubleshooting to support the operational NPES program.
- Support new hardware and software upgrades of the NPES operational environment to include testing and installation at all of the NPES sites.

US Air Force

June 1998 to August 2003

Headquarter Air Force Weather Agency (HQ AFWA) - Offutt AFB, NE

Tivoli Enterprise Management Systems Technician

- Administrator for all Tivoli enterprise database servers, management servers, gateway servers, and clients directly supporting worldwide military combat operations.
- Manage and perform initial setup, configuration and testing of new operating systems, application software, and hardware platforms operating in the Tivoli environment.
- Develop and integrate software for Tivoli's Enterprise Console database management system.
- Acted as Information System Security Officer.
- Responsible for training new Tivoli Enterprise Management Systems Technicians.

Weather Communications Operator

- Utilized the Message Distribution Terminals to process incoming and outgoing classified and unclassified messages for the HQ AFWA, Weather Communications Center.
- Operated the Tactical Forecast System and two UNISYS mainframe computer systems to ensure a continuous flow of time-sensitive weather data to US and NATO forces worldwide.
- Coordinated and assisted in troubleshooting Automated Weather Distribution System circuit problems and equipment outages.
